

SUNSHADE BLIND SYSTEMS

HIT THE TV SCREENS

SUNSHADE BLIND SYSTEMS OF CORBY NORTHAMPTONSHIRE HIT THE TV SCREENS THIS YEAR WITH THEIR SUNSHADE (2) BLIND SYSTEM IN THE PROGRAM 'LOVE THE PLACE YOU'RE IN'

PRESENTER GORDON WHISTANCE WAS HIGHLY IMPRESSED WITH OUR BLINDS AND TOLD THE VIEWERS THEY WERE A FANTASTIC IDEA.

THE PROGRAM CAN BE SEEN AGAIN ON UKTV STYLE +1 ON WEDNESDAY 11TH FEBRUARY AT 7.00PM

Exclusively manufactured under license by GlassTeq Sealed Units Ltd, a UK leader in domestic and commercial blind manufacturer and large scale insulating glass manufacturer, the blinds are designed to fit within a standard 18, 20, or 27mm cavity and can be made using any configuration of glass. Sunshade Blinds are hermetically sealed within an airtight cavity and conform to BS EN 1279-2, once sealed Sunshade Blinds are oblivious to dust, moisture and abuse, offering an improvement in acoustics, privacy, solar glare, and becoming more energy efficient.

Our manual Sunshade Blinds 1 & 2 are operated in two separate simple ways, either by a rotational magnet or by a sliding magnet, both on the external surface of the glass; both are an ideal hygiene solution for homes, offices, hospitals, schools and colleges, in fact a new use has been in the growth of the Home Garden office and Mick from leading manufacturer The Qube explains ' I needed something different to offer clients and this fitted the bill perfectly, as it does away with the need to drill the window frame for traditional blinds and has a wide range of colours to choose from, most of our customers have opted for the Sunshade option.

Always looking new, Sunshade Blinds avoid any accumulation of dust or bacterial particles and remove any potential for damage within public or commercial environments.

Available in a large range of colours, Sunshade Blinds are suitable for all types of frame material including PVC-u, Aluminium and timber.

All Sunshade Blinds are manufactured to BS EN 1279-2 and are all argon gas filled as standard, along with having an extensive guarantee and being UV stable, the long term performance of the sealed unit and the blind is assured.

A superb solution, Sunshade Blinds can make a positive contribution to improving the energy efficiency, light and acoustic properties of most buildings, providing comfort, elegance and style.
