- 7.2 The Delivery Date is approximate only and time for delivery shall not be of the essence unless previously agreed by the Seller in writing. The Goods may be delivered by the Seller in advance of the Delivery Date upon giving reasonable notice to the Buyer.
- 7.3 Where delivery of the Goods is to be made by the Seller in bulk, the Seller reserves the right to deliver up to 10 per cent more or 10 per cent less than the quantity ordered without any adjustment in the price, and the quantity so delivered shall be deemed to be the quantity ordered.
- 7.4 Where the Goods are to be delivered in instalments, each delivery shall constitute a separate contract and failure by the Seller to deliver any one or more of the instalments in accordance with these Conditions or any claim by the Buyer in respect of any one or more instalments shall not entitle the Buyer to treat the Contract as a whole as repudiated.

7.5 If the Buyer fails to take delivery of the Goods or any part of them on the Delivery Date and/or fails to provide any instructions, documents, licences, consents or authorisations required to enable the Goods to be delivered on that date, the Seller shall be entitled upon given written notice to the Buyer to store or arrange for the storage of the Goods and then notwithstanding the provision of Clause 8.1 of these Conditions risk in the Goods shall pass to the Buyer, delivery shall be deemed to have taken place and the Buyer shall pay to the Seller all costs and expenses including storage and insurance charges arising from such failure.

(b) in the case of Goods to be delivered otherwise than at the Seller's premises, the time of delivery or, if the Buyer wrongfully fails to take delivery of the Goods, the time when the Seller has tendered delivery of the Goods.

8.2 Notwithstanding delivery and the passing of risk in the Goods, or any other provision of these Conditions, the property in the Goods shall not pass to the Buyer until the Seller has received in cash or cleared funds payment in full of the price of the Goods and all other goods agreed to be sold by the Seller to the Buyer for which payment is then due.

8.3 Until such time as the property in the Goods passes to the Buyer:-

(a) the Buyer shall hold the Goods as the Seller's fiduciary agent and bailee, and shall keep the Goods separate from those of the Buyer and third parties and properly stored, protected and insured and identified as the Seller's property;

(b) the Buyer shall be entitled to resell or use the Goods in the ordinary course of its business, but shall account to the Seller for the proceeds of sale or otherwise of the Goods, whether tangible or intangible, including insurance proceeds, and shall keep all such proceeds separate from any moneys or property of the Buyer and third parties and in the case of tangible proceeds, properly stored, protected and insured; and

(c) provided the Goods are still in existence and have not been resold, the Seller shall be entitled at any time to require the Buyer to deliver up the Goods to the Seller and, if the Buyer fails to do so forthwith, to enter upon any premises of the Buyer or any third party where the Goods are stored and repossess the Goods.

8.4 The Buyer shall not be entitled to pledge or in any way charge by way of security for any indebtedness any of the goods which remain the property of the Seller, but if the Buyer does so all money owing by the Buyer to the Seller shall (without prejudice to any other right or remedy of the Seller) forthwith become due and payable.

9.2 The Seller shall not be liable to the Buyer or be deemed to be in breach of the Contract by reason of any delay in delivery or in performing, or any failure to perform, any of the Seller's obligations in relation to the Goods, if the delay or failure was due to any cause beyond the Seller's reasonable control. Without prejudice to the generality of the foregoing, the following shall be regarded as causes beyond the Seller's reasonable control:-

## Extended Warranty & Exclusions ( The Blind )

The warranty is provided for the IN2GLASS product, i.e., the blind system that is located between the glasses, only (the "**Product**").

Liability under this warranty is limited solely to the replacement of the Product in the cases where this warranty applies. This warranty shall be valid for a period of 5 years for manual blinds and 2 years for electric/motorised blinds, excluding external controls which carry a 12month warranty, following the date of purchase of the Product, subject to the following terms:

Any claims made under this warranty will only be handled subject to the submission of the purchase receipt of the defective Product also showing the purchase date.

This Warranty shall only apply to manufacturing or material defects in the Products. The warranty will not cover:-

- \* The cost of removal and/or reinstallation of the Product or glasses (Consequential loss).
- \* Damage or defects caused by incorrect unit measurements or unit fitting as stated in the Fitting Instructions
- \* Damages resulting from abuse, misuse, accidents or alterations to the Product.
- \* Damages resulting from failure to follow the instructions with respect to the Product, including in relation to measurement, proper installation, cleaning, maintenance and making changes in the structure of the double glazed unit.
- \* Damages due to exposure of the Product to any chemicals, including chemicals used to seal the edge of the unit. This includes installations in areas of high humidity and chemicals in the atmosphere. In such installations (e.g. swimming pools) the units should be bedded and capped in an inert silicone e.g. U9, and frame drainage should be enhanced.
- \* Damages due to the exposure of the Product to variable thermal conditions, including fractures resulting from tension created by local or partial heating units, large temperature variations and/or barometric pressure changes and geographical altitude.
- \* Differences in the pressure required to operate a blind. These may be due to a number of causes including changes in the atmospheric pressure, changes in temperature and the manner in which the insulated glass unit is installed.
- \* Defects in the Product in any case where the insulating double glazed unit was harmed or the units were not placed in a vertical position.
- \* Defects to the Product or the Glasses due to the ladder cords touching the coated glass.
- \* Unevenness in the Product where the slats do not sit centrally within the Cassette after installation
- \* Defects in the side rail positions due to lack of packing under the side rails
- \* The internal ladder cord distorting as the blind is being stacked and causing unevenness in the stack.
- \* Any visual effect on the surface of coated glasses, to include any internal scratches must be noted to us up to a period of 3 months from supply, outside of this time frame will not be considered for replacement. We recommend coated performance glass on the inner pane.
- \* Magnets that have rusted due to internal moisture content.

Extended warranty applications will be subject to a revised quotation, whilst we endeavor to make the product to the highest standard. There are visual effects that are beyond our control and are not subject to any warranty claim, these include the following items:

## **Tolerances**

### **Frame**

Due to the expansion and contraction of the unit as a whole, the aluminium spacer bar and/or the frame (Cassette) it may be possible that small gaps appear in the joints between the top, bottom and side rails (of the Cassette). This is permissible providing the gaps do not exceed 3mm.

### **Cords and Tapes:**

Due to the sum of the tolerances of the cord diameters and of the internal raising mechanism, it is possible for there to be a slight inclination of the bottom rail when raising the blind. This inclination is more marked in tall and narrow blinds. For this reason, sizes with these geometrical configurations, which are considered critical should be noted at the time of ordering and may not be included in the price list. It is also possible as a result of shrinkage of the raising cords, and also of the ladder tape, for the bottom rail to remain raised. Please remember that the materials of which both the cords and the ladder tapes are made undergo shortening as the temperature rises and lengthening as the temperature raises & falls. The coefficient of variation in length which is characteristic of these materials is about 0.02%/°C. For example, if a blind 1000 mm long undergoes a temperature increase of 50 °C compared with the temperature of manufacture, it will contract by 10 mm. It is also possible for packing in the ladder tapes and the dead weight of the bottom rail to cause the rail to bend. This bending also occurs to a lesser degree with tilting-only blinds, As the blind is raised, the folding of the ladder tapes does not occur in a regular and constant fashion. This variation can cause deviation of the slats from the Horizontal as they pack. This does not constitute a reason for a claim.

Depending on the width of the blind it may be necessary for central cords to be fitted to provide support to the middle of the slats. Unlike the cords which raise the blinds (they pass through holes in the slats) the central cords are 'floating' and not attached to the slats in any way. As a result the central cords may move sideways and thus not stack vertically when the slats are raised. The placement of the central cords can be affected by a sideways movement of the blind unit e.g. in doors and especially in sliding all doors. This does not constitute a reason for a claim.

### **Bottom rail:**

With reference to standard EN 13120, the maximum acceptable inclination of the bottom rail with respect to the mid-point is +/-7.5 mm (15 mm total), without distinction as to the position of the blind. The Sunshade production standard specifies tolerance measurements with the blind in three positions.

\*The allowable tolerance on the dimensions of the screen: Width 0 mm / mm -1.  
Height 0 mm / mm -1.

\*Tolerance on parallelism of the bottom rail + / - 5 mm.

\*Tolerance on the bending of the bottom rail -

Up to 1.5 meters = 5mm,

Between 1.5 – 2.2 meters = 10 mm,

More than 2.2 meters = 15 mm.

### Correct slat Closure:

Take up a position 1 m from the inner sheet of glass, after identifying the line on the unit corresponding to eye-level look outwards at the level hidden by the slats, it should not be possible to observe objects behind the unit at the observers eye level.

**Note.** As a consequence of this tolerance, it is possible for neighboring blinds to have different degrees of closure.

It is not necessary for slats to sit centrally within the Cassette for the correct operation of the blind.

### Non Conformity:

Assessment of all non-conformities in Sunshade products must be based on visual observation of the blind fitted inside the cavity of the insulated glass unit. This assessment relates only to visible elements of the blind including head-rail, slats, bottom rail, side rails and spacer bars. Evaluation of the quality of the glass is not the subject of this assessment standard.

### Assesment of the Blinds

Assessment of the quality of the blind must comply with what is specified in the following points:

- The double-glazed unit with the Sunshade blind incorporated must be positioned vertically, as specified when glazed.
- The blind must be lowered and the slats tilted to approximately 45°
- The observer must be positioned at a distance of 2 m from the unit with line of sight perpendicular to the surface of the unit on both sides.
- The assessment must not be carried out with direct sunlight falling on the slats.

### Assessment of the Glass

All quality standards for the glass of the insulated glass units are assessed by the Glass and Glazing Federation, Quality of Vision, Double Glazing standards.

### Site Visits

On occasion a customer may feel that a technical site visit is required by a Sunshade/PJB Glass Group representative. It should be noted that a charge will be raised for such visits should it be discovered that these Terms and Conditions have not be complied with.
